Problem 5 — Sales Dashboard Summary	Answer	
Create a professional summary section using formulas only.	Static Dashboard Dynamic Dashboard Using SUBTOTAL	
Calculate		
1. Total Sales		816550
2. Average Profit		10403.333
3. Maximum Profit		24000
4. Minimum Profit		5000
5. Total Orders		15
6. Total Delivered Orders		12
7.Total Pending Orders		1
8. Total Cancelled Orders		1
Now apply a filter		
Region = West		
Observe which summary values automatically change using SUBTOTAL.	This is why SUBTOTAL is preferred for interactive reports and dashboards where users frequently apply filters.
