Problem 1 Create an Expected Invoice Date as Order_Date + 2 days using the DATE() function.

Problem 2 Create a date representing the first day of the Order month.

Problem 3 Create a date representing the last day of the Order month using DATE() logic (without EOMONTH).

Problem 4 Create the financial year start date (1-Apr of the order year).

Problem 5 Create a new column showing 1-Jan of the same year as Order_Date.
