

Category	Sum of Amount	Why is Electronics the largest rectangle? In a Treemap, the area of each rectangle is proportional to its value. Since Electronics has the highest total sales amount (₹39,77,080), it occupies the largest area.
Appliances	1900513	
Books	1532457	
Clothing	2218903	
Electronics	3977080	
Furniture	2775291	
Others	1373800	

Identify the largest category by Amount and calculate its percentage contribution to the total Amount using a supporting formula.

Electronics is the highest-contributing category, generating ₹39,77,080 and total sales 1,37,78,044 , which accounts for approximately 28.87% of total sales. This indicates that Electronics is the primary revenue driver and should be prioritized for inventory planning, promotions, and sales forecasting.

Rank the categories from highest to lowest Amount and compare the Treemap result with your ranking.

I ranked the categories using the Pivot Table by sorting the total sales from largest to smallest. I then validated the ranking against the Treemap. The rectangle sizes matched the sorted values, confirming that the Treemap accurately represents the proportional contribution of each category.

Your ranking is:

- 1 Electronics – ₹39,77,080
- 2 Furniture – ₹27,75,291
- 3 Clothing – ₹22,18,903
- Appliances – ₹19,00,513
- Books – ₹15,32,457
- Others – ₹13,73,800
