Problem 4 — Profit vs Profit Margin Analysis					
Management wants to compare absolute profit with profitability percentage.					
			Row Labels	Sum of Sales_A	Sum of Profit
Month	Profit	Profit Margin %	2025-01	4510000	598000
2025-01	598000	13.26%	2025-02	4820000	688000
2025-02	688000	14.27%	2025-03	3390000	484000
2025-03	484000	14.28%	2025-04	5260000	750900
2025-04	750900	14.28%	2025-05	5490000	783700
2025-05	783700	14.28%	2025-06	3610000	515200
2025-06	515200	14.27%	2025-07	5740000	819400
2025-07	819400	14.28%	2025-08	6020000	859300
2025-08	859300	14.27%	2025-09	3850000	549500
2025-09	549500	14.27%	2025-10	6280000	896400
2025-10	896400	14.27%	2025-11	6950000	992000
2025-11	992000	14.27%	2025-12	4320000	616600
2025-12	616600	14.27%	Grand Total	60240000	8553000

Is the company generating higher profit because of higher sales, or because of better margins?
Profitability percentage remained largely stable throughout the year, while absolute profit increased substantially during higher-sales months. Therefore, the increase in profit is mainly driven by increased sales/revenue rather than meaningful improvement in profit margin.
